EXCEPTIONAL WASTE SOLUTIONS

WASTE CONSULTING FOR COMMERCIAL CONSTRUCTION

ONE CALL.
WE HANDLE THE REST.

We plan the waste side of your project, hire and manage the haulers, and file the recycling and LEED reports. Your team gets one number to call.

WHAT WE DO

01
RESTROOM TRAILERS
These have flushing toilets, running water, heat and air. They come in two to ten stalls on a 28-day rental, with service matched to your crew size.

02
ROLL-OFF DUMPSTERS
We bring 10, 20, 30 and 40 yard dumpsters for construction debris, commingle, concrete, drywall and metal, and swap them on your schedule.

03
RECYCLING AND DIVERSION
We plan your material streams around your LEED target, send each one to a facility that processes it, and document every load ticket by ticket.

04
PORTABLE RESTROOMS
We carry standard, ADA and flushable units, handwash stations, and holding and freshwater tanks. We also have crane-lift units for rooftop work.

05
STORAGE AND OFFICE TRAILERS
We can set you up with storage containers, office trailers and locker trailers.

06
EVENTS AND WEDDINGS
We bring the same trailers out for a weekend, and we deliver, service and pick them up around your event.

LEED AND DIVERSION REPORTING

REPORTING YOU CAN HAND TO THE OWNER
Every diversion rate we report comes from the scale ticket for each haul. We match it to what the receiving facility reports it recycled, and we sign the report before it leaves our office.

WHERE WE WORK

Our home base is Kansas City. We have active work in Missouri, Kansas, Iowa, Nebraska, Texas and Florida.
